Software Developers

Join our team and help us create amazing web applications!

Overview

Farragut is looking for software developers who have a learning mindset to design, develop, and test our web applications. You will work closely with other developers, testers, and customers to ensure the quality and functionality of our products. You will also use your creativity and skills to improve and innovate the user interface of the existing application.

Key Responsibilities

- Build, test, deploy, and maintain applications using Microsoft .NET, Visual Studio, C#, JavaScript, CSS, React, and SQL Server with a focus on Human Centered Design
- Follow project processes as directed by managers
- Use agile development methods
- Work with developers and teams for integration alignment with other products

Qualifications

- Strong Learning Mindset
- Experience with utilizing AI / Copilot in software development or use in increasing developer productivity is a plus Bachelor's degree in computer science, software engineering, or a similar field
- Minimum 0-3 years of web development experience with Microsoft SQL Server, React, and C#, .Net Core, Object Oriented concepts
- Familiarity with reporting solutions including MS SQL Server Reporting Services (SSRS), Power BI
- Microsoft Azure certification is a plus
- In-depth understanding of web development best practices, standards, and tools
- Capacity to work independently and collaboratively
- Strong interpersonal skills and customer focus
- Excellent problem-solving, analytical, and communication abilities

FARRAGUT™

About us

Farragut is a provider of software solutions for the Workers' Compensation and Local Government markets. Specifically, we have created software that automates manual transactions and stores important data for Workers' Compensation Bureaus and NC counties. Farragut's systems allow our clients to better utilize their resources and to do their work more efficiently.

Farragut's purpose is to enhance the potential of our employees, customers, and customer collaboratives. We work to transform how our customers conduct their business by earning their trust and delivering continuous innovation. We lean on our three pillars of courage, synergy, and transformation. Farragut offers an environment where people who are passionate about achieving meaningful results, value innovation, and embrace our customers' objectives as their personal responsibility can excel.
