

SW Developer Intern

Position Overview

Farragut is seeking a detail-oriented **Software Developer Intern** to join our software engineering team. This internship is ideal for a student or recent graduate who has a strong foundation in **front-end development** and desires to gain hands-on experience in **Microsoft technologies** including **C#, ASP.NET, SQL Server, and Visual Studio**.

Key Responsibilities

- **UI Development:** Assist in building and enhancing user interfaces using **HTML, CSS, and JavaScript**.
- **Code Maintenance:** Help maintain and refactor existing codebases in **ASP.NET Web Forms / MVC**, ensuring adherence to coding standards
- **Front-End Enhancements:** Collaborate with developers and designers to implement responsive, user-friendly interfaces and perform UI bug fixes or refinements.
- **Project Integration & Testing:** Assist in integrating frontend with backend services and help in unit testing or debugging.
- **Accessibility Compliance (ADA):** Review and implement changes to web pages to ensure **ADA compliance**, including proper semantic HTML, contrast ratios, keyboard navigation, and screen reader compatibility.
- Collaborate with cross-functional teams to provide solutions
- Continually learn and understand customer business processes and software functionality

Requirements

- Strong knowledge of **HTML, CSS, and JavaScript**
- Fundamental knowledge of **C#** and **ASP.NET** (either Web Forms or MVC)
- Experience using **Visual Studio** for development
- Understanding of **SQL Server** basics (queries, CRUD operations)
- Familiarity with Git version control
- Familiarity with accessibility tools (e.g., Lighthouse, WAVE, axe)

The Ideal Candidate will possess the following the soft skills:

- **Team Player:** Ability to work collaboratively with cross-functional teams, QA, product managers, and other developers.
- **Communication:** Excellent verbal and written communication skills. Capable of explaining technical concepts to non-technical stakeholders.
- **Problem Solver:** Strong analytical and debugging skills; ability to identify root causes and propose solutions.
- **Adaptability:** Comfortable working in a dynamic, evolving environment with changing priorities.
- **Ownership & Accountability:** Proven ability to take full ownership of assigned tasks and deliver quality output within established deadlines.

Qualifications:

- Associate or Bachelor's degree in Computer Science or a related field
- Junior or Senior working towards degree in Computer Science or a related field

Please send resumes to: hr2@farragut.com

About us

Farragut is a provider of software solutions for the Workers' Compensation and Local Government markets. Specifically, we have created software that automates manual transactions and stores important data for Workers' Compensation Bureaus and NC counties. Farragut's systems allow our clients to better utilize their resources and to do their work more efficiently.

Farragut's purpose is to enhance the potential of our employees, customers, and customer collaboratives. We work to transform how our customers conduct their business by earning their trust and delivering continuous innovation. We lean on our three pillars of courage, synergy, and transformation. Farragut offers an environment where people who are passionate about achieving meaningful results, value innovation, and embrace our customers' objectives as their personal responsibility can excel.
